

PIERRE KONAN

CLOUD ENGINEER | DEVOPS | AWS | TERRAFORM | KUBERNETES

Dallas, Texas | Email: pierre.i.konan@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Cloud Engineer candidate with a software development background and hands-on experience with AWS, Terraform, Docker, Kubernetes, CI/CD, Linux, and modern web technologies. Experienced in Infrastructure as Code, cloud monitoring and recovery workflows, containerized applications, CI/CD automation, and full-stack development. Seeking Cloud Engineer, DevOps, or Cloud Support roles focused on reliable, scalable cloud environments.

TECHNICAL SKILLS

Cloud: AWS

Infrastructure / DevOps: Terraform, GitHub Actions, CI/CD, Docker, Kubernetes

Systems / Tools: Linux, Bash, Git, GitHub, AWS CLI, kubectl

Programming: JavaScript, TypeScript, Python

Web / Data: Next.js, React, Express.js, PostgreSQL, MySQL, MongoDB, Tailwind CSS

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02) | AWS Certified Solutions Architect - Associate (SAA-C03) |

HashiCorp Certified: Terraform Associate (004) | Certified Kubernetes Administrator (CKA)

PROJECTS

KubeMonitor - AWS Infrastructure Monitoring & Auto-Recovery | *AWS, Terraform, Kubernetes, Docker, GitHub Actions*

- Designed a cloud operations project to monitor AWS infrastructure health across EC2, S3, load balancing, and database services.
- Defined repeatable infrastructure using Terraform and version-controlled Infrastructure as Code practices.
- Built a GitHub Actions CI/CD workflow for validation and deployment while incorporating monitoring, alerting, least-privilege IAM, reliability, and recovery workflows.

VitalPilot - AI-Powered Health Monitoring Platform | *Next.js, TypeScript, SQL, FastAPI*

- Developed a full-stack healthcare application for tracking patient vitals, trends, risk flags, and AI-generated summaries through a responsive web dashboard.
- Built frontend workflows with Next.js, React, TypeScript, Tailwind CSS, and React Hook Form, supported by FastAPI and a relational database architecture.
- Collaborated in a senior design environment with emphasis on requirements, data integrity, usability, security, and scalable application architecture.

TXUML - Texas Underground Mine Locator | *JavaScript, Mapbox GL, Web Development*

- Built an interactive web application with classmates to explore underground and surface mine data across Texas using Mapbox GL.
- Implemented clickable mine markers, contextual map overlays, and user-dropped pins for calculating and displaying proximity-based risk scores.

EDUCATION

University of Texas at Arlington (UTA) | Arlington, TX

Bachelor of Science in Computer Science

Relevant Focus: Cloud Computing, Computer Networks, Software Development, Software Engineering, Operating Systems
